

WinField™ Cornerstone® Products

Unsurpassed grass and broadleaf weed control for Roundup Ready® crops

Flexible, Broad-Spectrum Weed Control

Cornerstone® herbicides are postemergent, nonselective herbicides that are absorbed and translocated throughout annual and perennial grass and broadleaf weeds for “shoots-to-roots” control. Cornerstone® herbicides control more than 100 annual and perennial weeds and includes a broad spectrum of uses, including over-the-top application to Roundup Ready® alfalfa, canola, corn, cotton, soybeans and sugar beets.

Adjuvants Enhance Performance

The use of surfactants and/or other adjuvants with Cornerstone® herbicides is recommended for optimum performance. For the best product performance, use a quality nonionic surfactant such as Class Act® brand or Preference® plus Alliance® adjuvants. Adjuvants that contain ammonium sulfate (AMS) such as Class Act® brand and Alliance® adjuvants are recommended when using hard water or under environmental stress conditions.

To lock in spray coverage or deposition and lock out drift, include InterLock® or PowerLock® adjuvants.

Uses and Benefits

- Provides broad-spectrum control of annual and perennial weeds in Roundup Ready® alfalfa, canola, corn, cotton, soybeans and sugar beets
- Controls more than 100 broadleaf weeds and grasses
- Easy to mix and apply
- Flexible, wide window of application
- Excellent crop safety and no carryover concerns

Ingredients

Cornerstone® Plus herbicide	
Glyphosate	41%
Inert ingredients	59%
TOTAL	100%

Cornerstone® Plus contains 4 pounds active ingredient per gallon.

Cornerstone® 5 Plus herbicide	
Glyphosate	53.8%
Inert ingredients	46.2%
TOTAL	100%

Cornerstone® 5 Plus contains 5.5 pounds active ingredient per gallon.

Application Rate and Recommendations

Cornerstone® herbicides may be used for non-crop, preplant burndown; preemergent burndown; postemergence on Roundup Ready® herbicide-treated crops; and preharvest or postharvest. To prevent severe injury or plant destruction, avoid Cornerstone® herbicide contact with foliage, green stems and other parts of desirable plants and trees.

Target Weeds	Weed Size	Cornerstone® Plus Herbicide Rate per Acre*	Cornerstone® 5 Plus Herbicide Rate per Acre*
Most annual weeds such as foxtail, common ragweed, velvetleaf, lambsquarters and cocklebur	Up to 6 inches	Up to 32 ounces	Up to 24 ounces
Giant ragweed, black nightshade, morningglory and groundcherry	—	Rate varies. See product label.	Rate varies. See product label.
Perennials such as Canada thistle, hemp dogbane, common milkweed and quackgrass	See product label.	See product label.	See product label.

Note: Sequential applications of Cornerstone® herbicides may be necessary to control new weed flushes.

*Refer to Cornerstone® herbicide label for specific recommendations.
